Counting Counts!

Divisional Profile and Development Indicators
from Census of India 2011

VINDHYACHAL DIVISION

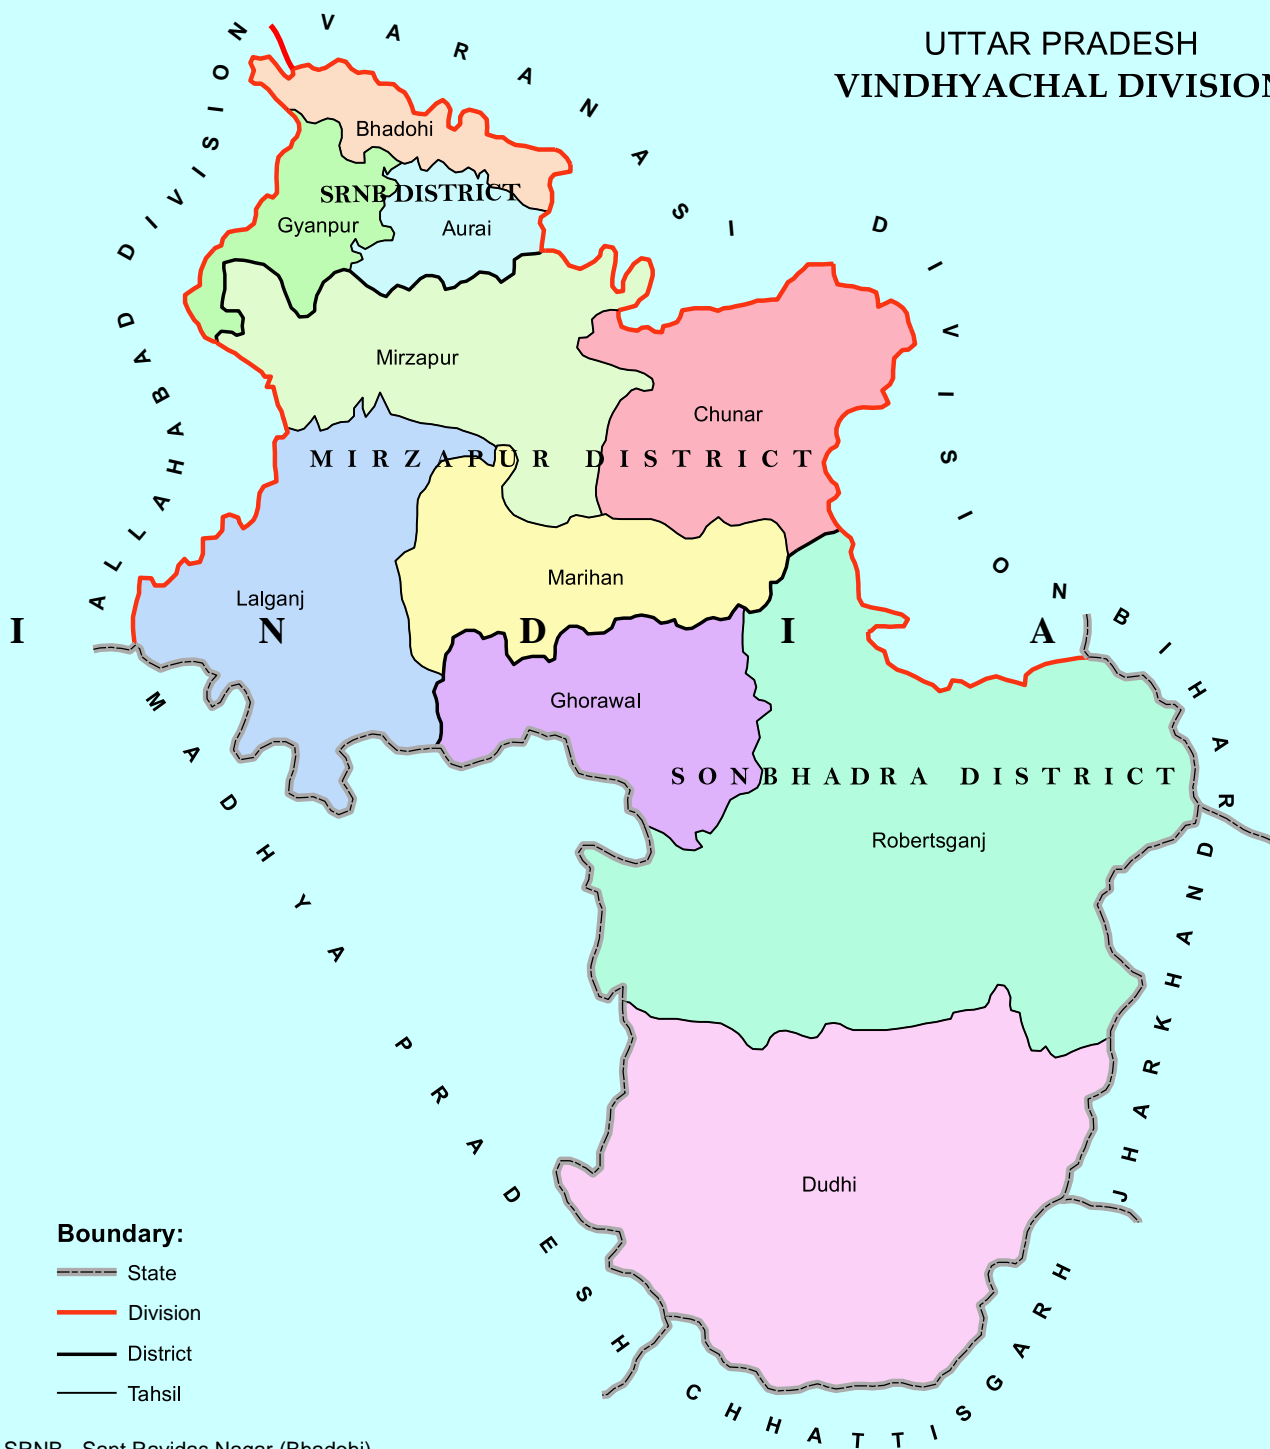

(Mirzapur, Sant Ravidas Nagar and Sonbhadra Districts)

2011

Directorate of Census Operations, Uttar Pradesh

UTTAR PRADESH VINDHYACHAL DIVISION

SRNB - Sant Ravidas Nagar (Bhadohi)

Vindhyachal division is one of the 18 administrative divisions of Uttar Pradesh with its headquarters at Mirzapur. The division came into existence on 14 June 1997 with districts comprising of Mirzapur, Sant Ravidas Nagar (Bhadohi) and Sonbhadra. The traditional carpet belt stretches to two districts of Vindhayachal (Mirzapur and Sant Ravidas Nagar) and the district of Sonbhadra is known for its mining activities and highest percentage share of tribal communities in the state.

Census 2011 is the fifteenth in an unbroken series since 1872 and it is the seventh Census of independent India. The present publication presents Census 2011 data highlights for Vindychal Division of Uttar Pradesh. It is a follow-up of the state level publication on Primary Census Abstract data highlights and printed with the support of UNICEF office for Uttar Pradesh. The divisional profile is prepared to ensure data dissemination to the lowest administrative levels and contains data at District, Tahsil and Town level from Primary Census Abstract and household amenities and assets tables. Data on disability, work status and age group are also included in the profile. Thematic maps are prepared with the help of CensusInfo version 2.0 and incorporated in the document to make the data set user friendly.

It gives me great pleasure to present this publication and would like to thank UNICEF, Field office for Uttar Pradesh for their support in bringing out this document. I acknowledge Dr. Piush Antony, Social Policy Specialist, UNICEF for her support in our efforts. I am also thankful to Shri Yogesh Kumar, State M&E Consultant, UNICEF for joining our team in preparing this document.

I extend my sincere gratitude to Dr. C. Chandramouli, Registrar General and Census Commissioner, India and Shri Deepak Rastogi, Additional Registrar General for their valuable guidance and constant support during the entire course of Census operations and release of data. I heartily acknowledge and appreciate the work of Shri Mohd. Ahmad, Deputy Director, Shri A.K. Rai, Assistant Director, Dr. S.S. Sharma, Assistant Director, Dr. Binod Kumar Singh, Senior Geographer and Shri A.A. Khan, Statistical Investigator Gr.I in fulfilling their tasks timely and efficiently in spite of their other official and administrative business.

Pradeep Kumar
Joint Director
Directorate of Census Operations,
Uttar Pradesh

We are happy to support printing of this document, 'Counting Counts : Divisional Profile and Development Indicators from Census of India 2011'. This is first in the series to present a comprehensive data set at divisional level. I thank the officers in the Directorate for their sincere efforts in bringing out this publication.

As the title suggests, counting definitely counts to ensure that basic rights are reached out to all in this largest democratic nation. In the state of Uttar Pradesh, several schemes and programmes are implemented to meet developmental needs of children and well-being of women and other marginalized sections. Hence, efforts have been made to present the data relevant for planning and policy corrections through tables, graphs and maps.

We hope that the data set made available at the Tahsil and Town level are discussed at various levels of administration and will improve use of data for planning and monitoring among district and block level administrators, front line workers, academicians and practitioners of civil society organization.

We are confident that this publication will be used by all in the division and will lead to better coverage and quality delivery of services to children.

Niloufar Pourzand Ph.D
Chief, UNICEF State Office for Uttar Pradesh

TABLE-13: Distribution of households by type of fuel used for cooking	30
TABLE-14: Distribution of households by possession of specified assets	33

List of Maps and Graphs

Percentage of Children in sub-districts	06
Population of Scheduled castes in three districts	06
Child Sex Ratio by sub-districts	09
Disabled Population by type of disability	11
Female Work Participation Rate by sub-districts	14
Rural - Urban percentage distribution of main & marginal workers at tahsil level	17
Percentage distribution of workers by broad category of economic activities	20
Percentage distribution of households by location of drinking water facility	24
Percentage distribution of households by type non-availability of latrine facility	29
Distribution of households by type of fuel used for cooking at tahsil level	32
Percentage of households by availability of mobile phone	35

Concepts & Definitions

Household	A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so.
Sex-ratio	Sex ratio has been defined as the number of females per 1000 males in the population.
Child Sex-ratio	Child Sex-ratio (0-6 years) has been defined as the number of females in age-group 0-6 years per 1000 males in the same age-group in the population.
Literate	A person aged 7 years and above who can both read and write with understanding in any language has been taken as literate.
Literacy rate	The ratio of the number of literates per 100 persons in the age group 7 years and above.
Main Workers	Those workers who had worked for the major part of the reference period (i.e. 6 months or more) are termed as Main Workers.
Marginal Workers	Those workers who had not worked for the major part of the reference period (i.e. less than 6 months) are termed as Marginal Workers.
Cultivators	For purposes of the census a person is classified as cultivator if he or she is engaged in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share.
Agricultural Labourers	A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer.
Household Industry Workers	Household Industry is defined as an industry conducted by one or more members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas.
Other Workers	All workers, i.e., those who have been engaged in some economic activity during the last one year, but are not cultivators or agricultural labourers or in Household Industry, are 'Other Workers(OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'
Work participation rate	Work participation rate is defined as the percentage of total workers (main and marginal) to total population
Town	Town is the smallest unit for urban areas. The definition of urban area adopted is as follows:
	(a) All statutory places with a municipality, corporation, cantonment board or notified town area committee, etc.
	(b) A place satisfying the following three criteria simultaneously: i) a minimum population of 5,000; ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and iii) a density of population of at least 400 per sq. km. (1,000 per sq. mile).
City	Towns with population of 1,00,000 and above are called cities.

Note: For more details, see census website: www.censusindia.gov.in

FIGURES AT A GLANCE

Vindhyachal Division

		2001	2011	Variation	<p>Vindhyachal is one of the smallest divisions in the state with three districts. Decline in sex ratio, especially in urban areas and among children is a cause of concern. The division also needs attention and support for its significant share of Scheduled Caste (24%) and Scheduled Tribe (6.9%) population.</p> <p>In particular, tahsils with higher share of SC population (Marihan, Lalganj, Ghorawal) and ST population (Dudhi, Robertsganj) demand special focus as these tahsils also have lowest figures for other development indicators.</p>

Children constitute 16.7% of the total population of Vindhyachal division. In the age group of 0-6 itself, there are 9,92,296 children.

SC population in all three districts is more than the state average of 20.7. (Sant Ravidas Nagar-22.4%, Mirzapur-26.5% & Sonbhadra-22.6%).

Mirzapur is one of the ten districts in the state with high proportion of SC population.

ST population in the division is 6.9% (Sant Ravidas Nagar-0.1%, Mirzapur-0.8% & Sonbhadra-20.7%) and Sonbhadra has the highest proportion of ST population in the state.

Dudhi tahsil of Sonbhadra needs special mention as it has 31.1% of ST population in total and for the rural areas, the percentage is 41.8.

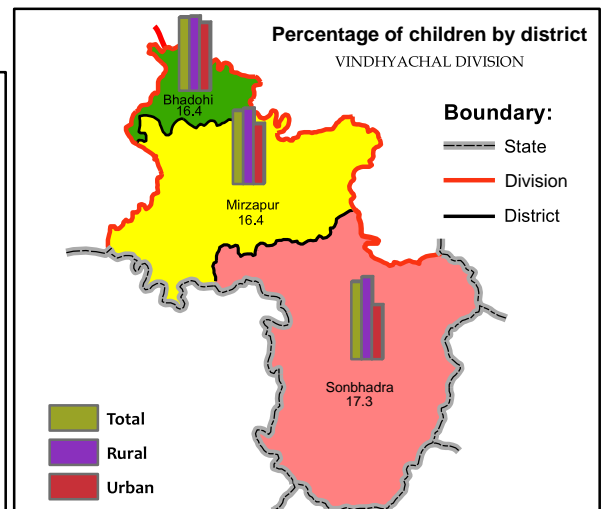

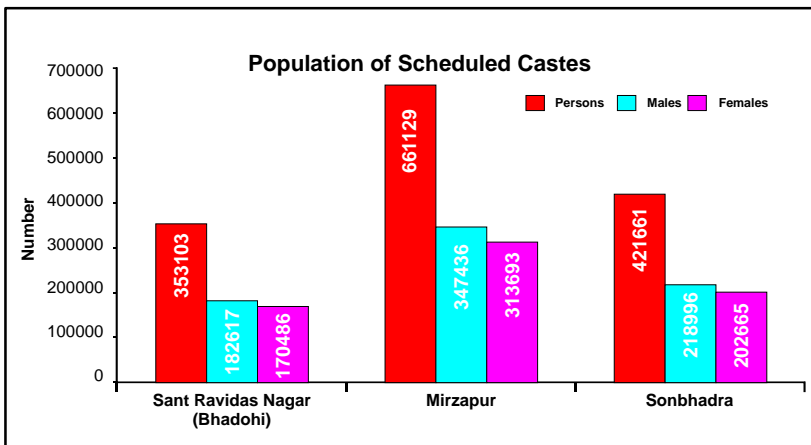

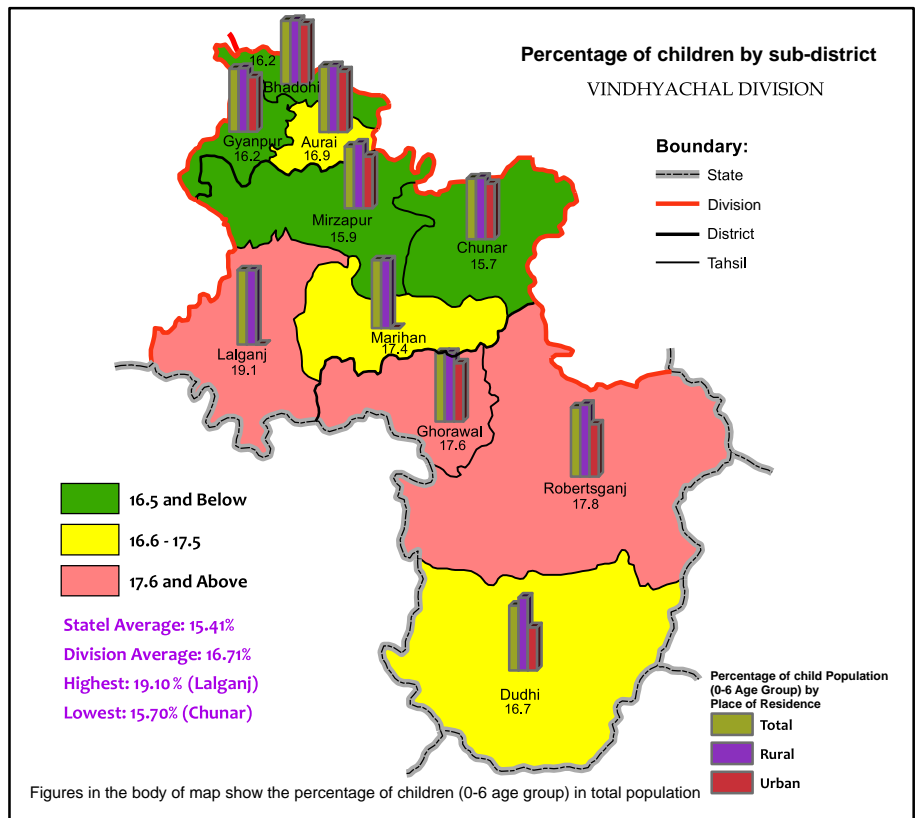

TABLE-2 : Sex Ratio, Number of Literates and Literacy Rate

*The denominator in the case of this census unit is very small. Thus even small variation in the number leads to such unusual figure.

214386	Bijpur (CT)	Urban	862	796	885	994	7,295	4,195	3,100	87.4	94.0	79.8	14.2

Vindhychal division has witnessed an increase in literacy during the last decade. However, illiteracy among female population is still 44.8% (Table 2). Male-Female Gap in Literacy Rate in the division (23.2 per cent points) is higher than that of Uttar Pradesh (20.1 per cent points) and highest gap in the division is recorded for SR Nagar district (25.4).

If one looks at sex ratio and literacy rate at sub-district level, they do not show any clear pattern, indicating influence of other contributing factors. Lowest rural female literacy rate is recorded in Lalganj, Dudhi and RobertsGanj tahsils for the ostensible reason of higher share of SC/ST communities. However, lowest child sex ratio in the rural areas is recorded in Ghyanpur Tahsil of Sant Ravi Das Nagar (892) and it has comparatively higher rural literacy (68.6).

Favorable sex ratio is seen among the tribal population in the tahsils of Gyanpur, Lalganj, Ghorawal, Robertsganj and Dudhi while scheduled caste communities mostly show the trend of lower sex ratio than overall sex ratio of the census unit. If sex ratio is worked out for 0-1 years in the division (i.e. for children born in the year 2010-11), lowest sex ratio (897) is in Mirzapur followed by Sonbhadra (910) and SR Nagar (911). Social value of girls and women are intrinsically linked to certain customs (dowry, lineage and death rights) as well as education and economic opportunities. Increased awareness and effective implementation of PNDR Act along with schemes incentivizing girls and other social awareness programmes need to be carried out as a matter of exigency in some of these areas.

Nevertheless, female child deficit in the division needs further exploration to ascertain whether it is technology induced (spread of technology for identifying sex of the foetus and its social diffusion effect) or influenced by social and economic factors or a combination of both.

Population by age group allows for improving coverage of existing programmes. For example, Vindhyachal division needs to plan for a minimum of 1,08,270 children for immunization and provision of education for 1,399,567 children under RTE.

Data on disability is an efficient tool for improving coverage of programmes designed for persons living with disability 1.7 % of the total population of Vindhyachal division consists of persons with disability and the percentage share is almost equal in all three districts. In absolute terms, there are 6318 children in the age group 0-4 with various disabilities, while 9410 children are in the age group 5-9. Department of Women and Child Welfare, Department of Education and Department of Social Welfare have the mandate and hence, need to plan for full coverage of these children under various programmes and schemes. Health and nutritional needs, scholarship coverage, disabled friendly school infrastructure, provision of learning materials and teachers training are part of this planning process.

214385	Kota (CT)	Urban	4015	3509	506	9394	3655	5739	29.9	49.0	8.1
214386	Bijpur (CT)	Urban	2892	2481	411	6528	2579	3949	30.7	49.0	9.4

The division recorded work participation rate of 35, which is higher than state average. Highest work participation rate is shown by Sonbhadra, followed by Mirzapur. However, female work participation rate is only 23 for the division. Female Work Participation Rate (FWPR) being one of the robust indicators of development, low FWPR in all three districts is a matter of great concern.

FWPR is determined by a multitude of factors such as education, poverty, economic opportunities, social status of women and supporting facilities for care of young ones and elderly. Three districts in the division being relatively poor with higher FWPR in the rural areas, it can be assumed that work participation is poverty driven. Hence, programmes can be designed within the existing provisions and schemes to improve women's work participation especially in areas that enhance their productivity and self-worth leading to economic empowerment.

These can include: promotion of group based enterprises for women especially through formation of self help groups for non-farm activities; access to credit and markets along with appropriate skill development; training for adolescent girls in non-traditional areas as well as artisan work to promote self reliance among younger generation; strengthening MGNREG activities with a focus on women workers to improve village infrastructure and connectivity to enhance market access.

214386	Bijpur (CT)	Urban	91.0	92.5	81.8	9.0	7.5	18.2	27.9	2.8

Main workers in the division constitute only 58.6% which is lower than the state average of 67.8. (Sant Ravidas Nagar-61.0%, Mirzapur-60.9% & Sonbhadra-54.4%). This indicates under employment and demands appropriate programmatic correction in the employment sector.

The distribution of workers in the division shows 39% of agricultural labourers, 33% of other workers and 8.3% in household industries. For agricultural labours and household industries, the share is more than state averages of 30.3 & 5.9%. However, the percentage of cultivators (19.9%) is much less than that of state average (29%). Given this profile of the division, more employment opportunities need to be created in agriculture and allied activities while support can be enhanced to make household industries more productive.

Larger share of households in the division fall into 6-8 members category (36%), which is similar to the trend at the state level. Sant Ravidas Nagar has 28% of households with 9+ members. Given the low proportion of main workers in the division, larger households cause concern with regard to well being of children, especially, when most households are nuclear families (60.2). Elder children and girl children are likely to be engaged in sibling care and other households chores, depriving them of schooling.

Percentage of Households by Location of Drinking Water Source: Away

In Vindhyachal division, availability of drinking water is a major issue. Less than one-fourth of households (24.6%) in the division have availability of drinking water source within the premise. 49% of households can access water source near the premises. However, it is away for 26.4% households in the division.

'Away from premise' was recorded by Census, if the source was located beyond 100 meters from the premise in urban areas and beyond 500 meters in rural areas.

Considering tap water, covered well and hand pumps as safe sources of water, majority of households in the division are getting drinking water from safe sources. However, 18.4% of the households in Mirzapur, 21.6% in SR Nagar and 29.9% in Sonbhadra getting water from unimproved sources. This needs urgent attention as 80% of diarrheal diseases are caused by the consumption of unsafe water and this is one of the major causes of child mortality.

Percentage of Households by Non-availability of Latrine Facility

Number of people defecating in open in Vindhyachal division is more than the population of 108 countries like Oman, Kuwait, Mangolia etc. 74.7% of households in the division defecate in open, which shows low acceptance of individual latrines and/or lack of public facilities. Even in urban areas, households defecating in the open are as high as 30%, which is more than double that of the state average. Sant Ravidas nagar has the highest percentage of households (79.8%) defecating in open.

When estimated, the division also shows very low availability of toilets per person. This figure varies from 31 in Mirzapur to 50 in Sant Ravidas Nagar which is much higher than the desired level of 4-5 per person in a family. This warrants focus on sanitation efforts in the division especially to increase acceptance of toilets with reference to dignity of women and health benefits.

Given the fact that about 60 % of the households in three districts fall into BPL category, factors inhibiting these households in accessing the scheme for individual sanitary latrines for BPL demands attention from the point of view of social behaviour change.

TABLE-13 : Distribution of Households by Type of Fuel used for Cooking

Dependency on firewood and cowdung cake for cooking is quite high in the division. 48.9% households still use firewood and 33.5% resort to cowdung cake for cooking. Firewood collection and cowdung cake preparation are socially designated tasks for women and hence, tend to involve children. Many studies have shown that women and children spent significant share of their productive time in these activities. Alternate fuel sources such as biogas can be promoted under existing schemes to encourage woman to be economically productive and children to be freed from these tasks.

Distribution of Households by Type of Fuel used for Cooking

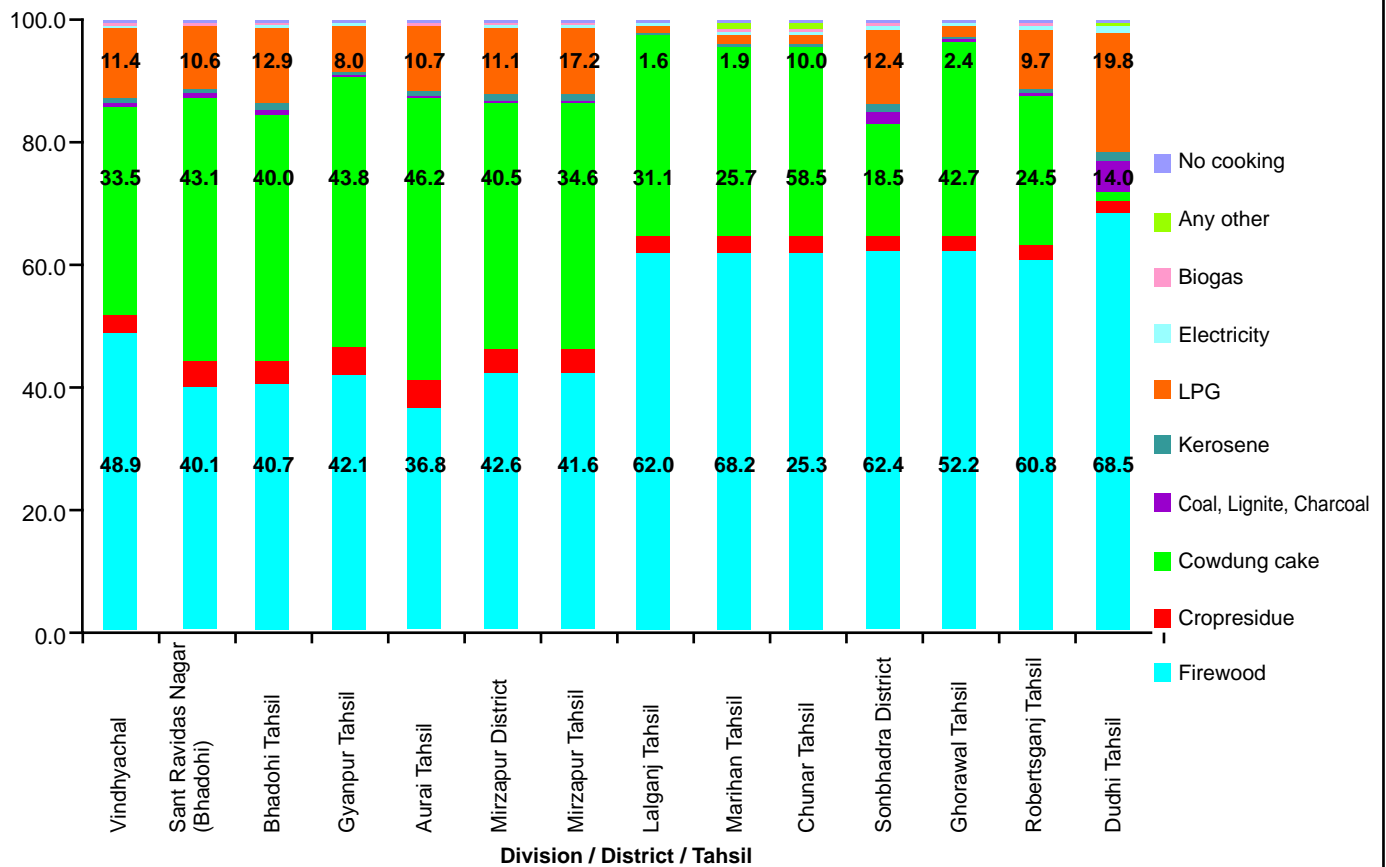

TABLE-14 : Distribution of Households by Possession of Specified Assets

Census Code	State / Division / District / Tahsil / Town	Total / Rural / Urban	Percentage distribution of households having assets & banking services														
			Total No. of Households (Excluding institutional households)	Radio, Transister	Television	Computer / Laptop			Telephone / Mobile phone			Bicycle	Scooter, Motor cycle, Moped	Car, Jeep, Van	None of the specified assets possessed by the household	Households availing banking services

Percentage of Households by Availability of Mobile Phone

Per cent of households

In the division, more percentage of households possess TV than radio/ transistor. Same is the case with mobile phones- more than 45% of population in the three districts have mobile phones. While Sant Ravidas Nagar recorded 62.6% of households with mobile phones, Sonbhadra has only 46.3 percentage with mobiles. However, penetration of mobile technology can be harnessed for promoting positive social behaviors such as institutional delivery, birth registration, full immunization and school enrolment and attendance.

जन्म पंजीकरण बच्चे का पहला अधिकार है।

प्रत्येक जन्म एवं मृत्यु का पंजीकरण सुनिश्चित करें।

- जन्म एवं मृत्यु पंजीकरण अधिनियम 1969 के अनुसार प्रत्येक जन्म/मृत्यु का पंजीकरण कानूनन अनिवार्य है।
- जन्म-मृत्यु का पंजीकरण 21 दिनों की समय-सीमा में कराने पर जन्म/मृत्यु प्रमाण पत्र मुफ्त दिया जाता है। 21 दिनों के पश्चात् जन्म-मृत्यु पंजीकरण कराने पर निर्धारित विलम्ब शुल्क ₹0 2/-, 5/- अथवा 10/- (जो भी देय हो) के भुगतान पर जन्म/मृत्यु प्रमाण पत्र दिया जाता है।

जन्म-मृत्यु के पंजीकरण के लिये स्थानीय रजिस्ट्रार से सम्पर्क करें। किसी भी तरह की असुविधा होने पर अपने जिले के जिलाधिकारी/जिला रजिस्ट्रार एवं मुख्य चिकित्साधिकारी/अपर जिला रजिस्ट्रार से सम्पर्क करें।
